

Developing your IT/OT Authentication Roadmap

A multi-disciplinary workshop for enterprise security and operational leaders on their passwordless journey

DESIGNED FOR:
IT, OT & Quality leaders in pharma

COMPLIANCE FOCUS:
21 CFR Part 11 · GxP · GAMP 5

HALF-DAY OR FULL-DAY FORMAT

Learn about Always On Authentication™

Authenticate once. Work Everywhere. Nymi's Connected Worker Solution enables continuous, frictionless authentication across GxP-regulated workflows and applications without repeated login or typing. **Always On Authentication™** is the best-in-class approach to eliminate password typing for your deskless workforce.

In regulated pharma manufacturing, every authentication event is a compliance touchpoint. Nymi's authentication workshop helps your IT, OT, and quality teams co-develop a practical roadmap to eliminate password friction from shop floor operations in systems like MES, DCS, SCADA, HMI, LIMS, and more, while meeting 21 CFR Part 11, Annex 11, and GAMP 5 requirements.

Session structure

- 45'** Connected Worker Vision & Passwordless Primer

Establish a shared understanding of **Always On Authentication™** technology, the connected worker model, and what frictionless IT/OT access looks like in practice.
- 90'** Breakout: IT Architecture & OT Integration

Technical deep-dives on enterprise identity integration (AD/LDAP, PAM), OT network segmentation, endpoint coverage, and use case mapping

MES / SCADA ERP & ESIGNING SHARED WORKSTATIONS PHYSICAL ACCESS
- 90'** Breakout: Compliance, Quality & Change Management

Map passwordless controls to regulatory requirements, define validation strategy, and plan organizational change for connected worker adoption.

21 CFR PART 11 GAMP 5 VALIDATION GXP AUDIT TRAILS
- 90'** Roadmap Synthesis & Business Case Development

Consolidate findings into a phased authentication roadmap, define KPIs, and build ROI models aligned to your organization's priorities.
- 45'** Executive Review & Next Steps

Present the roadmap and deployment plan to stakeholders. Agree on pilot scope, success criteria, and timeline.

KEY WORKSHOP TOPICS

- Security & Privacy by Design
- IT/OT Deployment & Operations
- Quality & Regulatory Compliance
- Tech Architecture & Integrations
- Change Management & User Adoption
- Building the Business Case

WORKSHOP DELIVERABLES

- Passwordless Roadmap w/ Always On Authentication™
- Nymi Business Case & ROI Calculator
- Phased Deployment Plan
- Compliance & Validation Blueprint
- Connected Worker Use Case Prioritization Matrix
- Adoption Readiness & Change Management Framework

YOUR NYMI SME TEAM

Six subject matter experts, one workshop

Your workshop is led by a cross-functional team of Nymi specialists covering every dimension of your passwordless journey.

Cross-Functional Engagement

Nymi and Stakeholder Alignment

Technical Architecture

IT/OT Technical Integration

Quality & Compliance

Regulatory & Risk Assessment

Change Management

Adoption & Transformation

Your workshop is customized. The standard agenda adapts to your technology stack, regulatory context, and deployment complexity – always led by 6 Nymi SMEs with deep pharma manufacturing experience.
